Cutting Edge Environmental Solutions

Tucker Mechanical has extensive experience providing mechanical services and environmental solutions for water/wastewater treatment plants, pump stations, filtration and pollution control facilities, flood mitigation systems, renewable natural gas projects, and more.

Complete Environmental Solutions Expertise

- » Chemical feed piping systems
- » Gas production and cleaning equipment
- » Process piping and associated plumbing, including above grade and underground piping
- » Plumbing and domestic water
- » Discharge piping
- » Sludge pumps
- » Sanitary piping
- » Submersible pumps
- » Wet discharge piping
- » Stormwater pumps
- » Wet well drain pumps
- » Slide gates, sluice gates, and stop logs
- » Insulation and architectural siding
- » Process equipment rigging and setting
- » Hangers, supports, and air relief elements
- » Structural steel erection
- » Cast-in-place concrete, epoxy concrete coatings, and concrete modifications
- » Demolition and removal
- » Air diffusion and fine bubble aeration
- » Equipment painting and coating
- » System integration, computer control, and data acquisition (SCADA)
- » Electrical renovations and upgrades
- » HVAC systems
- » Odor Control Systems

Highly Experienced Piping and Plumbing Professionals

Due to their critical nature, environmental systems demand the highest levels of efficiency, quality, and productivity. Backed by a team of licensed plumbers, engineers, and mechanical professionals, we're prepared to overcome even the most complex piping and utility challenges.

Additionally, for upgrades and renovations our team has the necessary experience and management processes to complete the work without interrupting regular plant operations.
